

# Which Test Is Right For You?

MD Now offers two types of Coronavirus testing to keep you safe. Here's what you need to know before you jump back into normal life.

## COVID-19 (PCR) Test

## Antibody Test

What is tested	This test helps determine whether you <b>currently have</b> the virus or not	This test determines if you <b>previously had</b> the virus
Why you should take this test	If you are <b>currently</b> experiencing mild coronavirus-like symptoms or if you think you have been exposed to the virus within the last 14 days	For reassurance to those who have already developed antibodies
How the test is performed	Oral, nasal, nasopharyngeal swab or a saliva sample. <b>MD Now offers the nasal swab test</b>	A blood sample is taken
Where to get tested	Call <b>888-MDNOW-911</b> to schedule an appointment at one of our designated COVID-19 clinics	Walk in to any MD Now clinic <i>not</i> designated for diagnostic testing and bring your ID and authorization form

The CDC, FDA, and other government agencies continue to test the tests, as well as the labs, equipment, and personnel that process the test results. MD Now has partnered with one of the top CLIA-certified high complexity laboratory companies in the US and uses the “gold standard” in both the PCR and antibody tests.

Get tested by a name you trust.
